

Joint Inquiry into Teaching and Learning

1. After developing a list of questions about what/how students are learning, select one topic or issue to pursue with further data collection and analysis. Identify that topic or issue below.

2. Describe your plan for data collection and analysis, including information about the designated lesson activity and the tools/methods you'll be using to collect the needed information. Attach the lesson plan and a copy or description of the collected data.

3. After you have individually analyzed the data and discussed your conclusions, summarize below what you have learned.

4. What are your next steps? (What changes will you make in your teaching and/or what further data will you collect?)
