

## Connecting to a Zoom Meeting from your Phone.

1. To get started, download the FREE Zoom app to your phone.
  - If you are on an Android, go to Google Play Market
  - If you are on an iPhone, go to the Apple app store
  - You can also google zoom app and you will get these choices

You can either install the Zoom app ahead of time or you will be asked to install it when you try to join a Zoom meeting.

If you do this ahead of time, it will make joining easier.

This is the app you are looking for: ZOOM Cloud Meetings

Click to **Install** the app.

When installed, you will see this same ZOOM icon in your applications folder.

Once you have the Zoom app on your phone, you are almost there.

2. The person hosting the meeting will send you a **meeting link** and a **Meeting ID**.

Because you have the Zoom app installed on your phone, **simply click on the meeting link**. This will take you to the zoom app and will ask you for your name. (This is so that when you join the meeting, your name will show up so that others will know who is joining the meeting.)

3. Zoom will ask you if it can use your microphone. Click **Allow**.

Zoom will also ask you if it can send you notifications. You can click **Don't Allow** at this time.

4. Next, you'll see a message to **Call Using Internet Audio**. **Click that** and you're in!

At the base of your of your phone you will see some options like

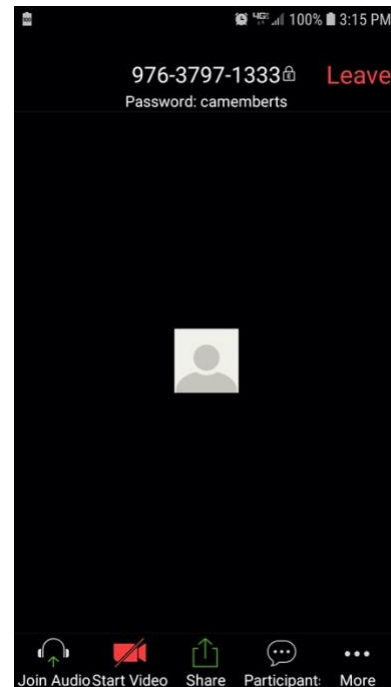

**Join Audio** – Call via Device Audio or Dial in Select  
**Device Audio**

**Start Video** - Click on that so that we can see you when you join the meeting and you can see us. (Do not worry about how you look. We all have this issue. Just join us and let us know how you are doing.

**Share** – This must be enabled by the Host for you to use. It is used in situations where others in the meeting need to see your desktop or screen.

**Participant** – If you click on this, you will see a list of who else is already in the meeting.

**More** – Because all of the options cannot fit on your screen, More opens with more options. You will not need to use any of these to join a meeting and successfully interact with others.

JoinAudio StartVideo Share Participant More

When the meeting ends or you are ready to leave, click on the words **Leave** in red in the upper left of your phone screen.

If at any time you do not see the options at the base of your phone screen or the Leave at the top, just gently tap your phone screen and they will appear, again.
