
WILLAMETTE ENVIRONMENTAL LAW JOURNAL

Spring 2018

Volume 8

EDITOR'S NOTE

The Editorial Team is proud to present the eighth issue of the WILLAMETTE UNIVERSITY ENVIRONMENTAL LAW JOURNAL. We want to thank the author, subscribers, and editorial staff members for their dedication to expanding knowledge and inspiring globally-minded discourse within the field of environmental and natural resources law. Staying true to that goal, the article in this issue presents a compelling argument for the development of offshore wind energy in Puerto Rico—a potential solution to efficient renewable energy growth that countries around the world should take note of. We hope that our readers find this issue a valuable legal resource.
